WHY 4-IN-1?

Combines sildenafil + tadalafil with apomorphine and oxytocin in one compounded sublingual troche. Oxytocin is included as part of a sexual-wellness formulation to support sexual arousal and intimacy.

MAJOR INTERACTIONS / CONTRAINDICATIONS

DO NOT USE with nitrates (e.g., nitroglycerin) or 5-HT₃ antagonists (e.g., ondansetron/Zofran).

Use caution with antihypertensives, alcohol, dopamine antagonists and QT-prolonging medications.

BASE — RECOMMENDED STARTING STRENGTH — \$119 / 10 troches

Sildenafil 70mg / Tadalafil 18mg / Apomorphine 2mg / Oxytocin 160 IU

SIG: Dissolve: 1/2 to 1 troche in cheek pocket or under tongue as directed before sexual activity.
MAXIMUM: DO NOT EXCEED 1 TROCHE PER DAY.

HIGH — PRESCRIBER-DIRECTED STEP UP — \$139 / 10 troches

Sildenafil 90mg / Tadalafil 22mg / Apomorphine 3mg / Oxytocin 200 IU

SIG: Dissolve: 1/2 to 1 troche in cheek pocket or under tongue as directed before sexual activity.
MAXIMUM: DO NOT EXCEED 1 TROCHE PER DAY.
